

# EQUISSENTIAL

— COMPLETE EQUINE PROTECTION —

“

Equissential is now a part of our daily routine. To find a product that provides bio-security, cleans, removes odours, and improves our horses living conditions and our working conditions all at the same time is nothing short of amazing. We are in a competitive business and anything that can help prevent our horses breathing in ammonia and dust can only be an advantage in their fitness and health.

”

Charlotte Morrall, Bloomfields

SCIENTIFICALLY ENGINEERED TO EFFECTIVELY REMOVE ODOURS, KILL & CONTROL HARMFUL BACTERIA & VIRUSES AND IMPROVE EQUINE HEALTH & PERFORMANCE

# EQUISSENTIAL

— COMPLETE EQUINE PROTECTION —

“

**Equissential...it's quite a revelation and every stable yard should have one!**

**Robert Smith, ShowJumper ”**

**Equissential** offers your horse an enhanced living environment, enabling improved breathing conditions whilst stabled, convalescing or travelling. Essential for competitive animals.

**Equissential is non-hazardous, non-irritant, non-carcinogenic, non-toxic, environmentally friendly and fully biodegradable.**

**Equissential** has multiple uses on and around your stable yard, wagon, trailer, tack, rugs and general equipment. It eliminates odours, ammonia and germs, improving living conditions for your horse or pony.

**Equissential** kills bacteria and germs allowing you and your horse to be free from potentially spreading or contracting contagious and infectious diseases. Additionally, dust particles will be encapsulated improving breathing conditions.

**Equissential** can be applied using a trigger spray, or for larger areas a backpack spray, mop and bucket or jet wash.

It is well known that Heaves (Inflammatory Airway Disease) is caused by the horse inhaling irritants like dust and ammonia and/or allergens. Using **Equissential** daily in your mucking out regime will substantially reduce the level of irritants entering your horses respiratory system, considerably lowering the risk of irritation, inflammation and dysfunction in the airways. Improved respiratory health will undoubtedly provide your horse with a competitive advantage over those with poorer environmental management.

- Clinically proven to remove 98% of ammonia \*
- Kills bacteria & germs
- Stops the spread of viruses and disease
- Eliminates odours on contact
- Improves air quality and encapsulates dust
- Improves living conditions
